Cartograms4All - Sprint 2 Report

Start doing:
- Start doing pull requests and code review properly.
- Make sure Scrum standups are more effective, and communicate clearly what we are working on.
- Be more specific on design goals if need be, and keep in mind what each feature means to the end user experience.

Stop doing:
- Stop accepting our own pull requests!
- Implement a "feature freeze" period

Keep doing:
- Pull requests
- Keep code separate and don't
- Be on time to standups
